

# Cydemate

by Redwood

the versatile and compact cycle maintenance stand

# How to use your Cyclamate

Clamp the Cyclamate base securely into your Workmate, bench or vice

Insert the Lower Tube into the hole in the base

Insert the Top Tube into the Lower Tube. Your Cyclamate is now ready to be used.

1. Remove the saddle and seatpost from the cycle.
2. Turn over the cycle and holding the front forks and seat stay, lower the cycle onto the Cyclamate, entering the top pin into the seat tube\*. Secure the cycle with the seat clamp, if required.

You can now turn the cycle a full 360°, giving you easy access to carry out repairs as well as general maintenance and cleaning at a safe and comfortable working height.

\*To ensure a perfect fit for your cycle, seat post shims can be supplied at a small additional cost if required.

# Specification

The Cyclemate is suitable for all cycles with a removable seat post and a seat tube internal diameter of at least 25mm.

The Cyclemate is designed to be used in conjunction with a "Workmate" type folding work bench or fixed bench vice with a minimum jaw opening of 100mm.

The Cyclemate is a high quality, UK-made product, manufactured using 100% Aluminium. It is designed to give years of practical service to the cycle enthusiast.

**Top Pin**  
25mm Dia. Solid Aluminium

**Lower Tube**  
32mm Dia. Tube  
5mm Wall Thickness

**Cyclemate Base**  
3.5mm Extruded Aluminium

**Weight**  
650g

Smaller than a book, but strong enough to support a full suspension mountain bike weighing more than 15kg!

It takes just seconds to assemble and due to its compact size, can easily be stored when not in use.
